Revised Bid Proposal

From: Thursday, November 3, 2016 at 2:00 p.m.

To: Thursday, November 17, 2016 at 2:00 p.m.

Questions and Answers:

1. Sheet M1.2 - The design that is shown in drawing M-1.2 is not a typical shooting range ventilation system. It not only has 2 MAUs but also 2 Exhausts which is very rare for a range that is only 31' wide and both units overlap each other for double supply and double exhaust.. Also the evaporative cooling units seem to be very small for the size and airflow needed for this size of range. Many of the specifications for this shooting range mechanical system seem to be for a system with air conditioning and recirculation not an evaporative cooled purge style system shown in the drawings.

RESPONSE: Provide mechanical system as specified.

2. Spec Section 23 01 00 - 2.02B - Exhaust Mid filters - are exhaust mid filters required on this project? It is only typical to have these mid filters in a recirculation system, not a purge system as shown in the drawings.

RESPONSE: Yes. Provide Exhaust Mid-Filters per paragraph 2.02.B

3. Spec Section 23 01 00 - 2.03A.5 - All ductwork outside of the building shall have R-8 insulation - Again this his usually only found in a system with recirculation. The purge system as shown in the drawings will not benefit at all from having insulated exhaust ducting. Please advise if this is required.

RESPONSE: Yes. Provide R-8 insulation in accordance with SMACNA standards per paragraph 2.03.A.5
